GLADIOLUS, DAHLIAS, IRIS, PEONIES AND OTHER PERENNIALS

All orders of \$1.50 or over from this list postpaid in U. S.

DISCOUNTS: Orders of \$2.00 or over will receive 10%; \$10 and over 15%, and \$25.00 and over, 20% extra in bulbs, excepting collections on which we give extra count.

THRIPS

All glad bulbs should be disinfected as thrips or their eggs may be destroyed easily by the following methods:

Napthalene flakes scattered among the bulbs, 1 oz. to each 100 bulbs, covering bulbs with heavy papers or enclosing in tight paper bags. This should be done after bulbs are cured (five or six weeks after digging). Allow flakes to remain three weeks and then remove bulbs and keep in cool temperature, 5 or 10 above freezing, if possible.

Soaking should be done just prior to planting. Any of the following solutions help prevent disease and also destroy bugs and eggs:

Bichloride of Mercury, 1/2 oz. to 4 gals. water, soak three hours or more.
Common lye, 1 can to 20 gals. or one tablespoon to each gallon of water, soak six to eight hours, or over night.

Dissolve ingredients in a little hot water, then mix well in cold water.

The above should not be used in metal containers as they corrode metal.

Spraying may be done with following: 2 lbs. brown sugar, 1 tablespoon paris green, 3 gals. water. Spray when plants are 1 ft. high and once weekly until buds appear, or use 2 tablespoons of arsenate of lead instead of paris green.

* * * * *

Let us know your wants. We also have several varieties not on list. If there are special varieties you want, let us know.

Gladiolus will grow in almost any soil, but not so well near trees or too near buildings. They like lots of sun and a well drained soil. If your ground is rich do not use much fertilizer. Bone meal and sheep manure are very good lightly raked in the soil after bulbs are planted.

Gladiolus can be planted in a trench 7 or 8 inches wide in a double row from 2 inches apart or more according to space and number of bulbs you wish to plant. Plant bulbs about 5 or 6 inches deep in light soil or about 4 inches in heavy soil and the small bulks from 3 to 4 inches. Keep the weeds cut and cultivate often as you want to, as they like it. Give plenty of water when buds are forming.

Cut the flowers when first blossoms show and by changing the water daily and removing withered blossoms they will keep a week or more. Be sure in cutting the blooms to leave 4 or more leaves on the plant to mature the bulb.

Dig the bulbs when the leaves turn brown, cut tops and dry for a few weeks; then remove old bulbs and root and store until planting time in cool, dry room or cellar, but be sure they do not freeze.

* * * * *

Mixed Collections

SELECT MIXTURE NO. 1—50c per dozen, \$3.00 per hundred, large bulbs; medium \$2.00 per hundred; small, \$1.00 per hundred. Over 40 different varieties made up from regular stock.

NO. 2, GOOD CUT FLOWER MIXTURE—\$2.00 per 100 large bulbs; \$1.25 per 100 medium bulbs; 75c per 100 small bulbs.

SEEDLING MIXTURE—\$1.50 per 100 large bulbs, and \$1.00 per hundred medium.

DAHLIAS—We grow over 60 varieties.

MIXED DAHLIAS—Lost labels, etc.; some real good ones in this mixture; 12 for \$1.00.

BANNER COLLECTION—12 large flowering kinds, all different, for \$2.00.

PRIZE COLLECTION—12 extra good ones, labeled separately, for \$3.50; also several fine large varieties at 25c each.
